They completely dropped the ball and left me hanging, with no explanation. I drove into Denver Friday and picked up an older xrf that worked for about ½ day. I don't particularly want them to do anything, I can collect samples and will arrange for analysis. I could use one of the xrf's that are in Silverton, but am not going to drive there to get it. PATHETIC CONTRACTOR.

Hopefully they got you somebody? Dave Robinson is deploying to Gold King so I don't know how he resolved your request below. Let me know if I need to do something.

So the scheduled arrival of START on my Removal action is not going to happen tomorrow. No one called until I called John West earlier today. John had taken the site over for Megan A. who is leaving Weston. Dave R. did finally call in the last hour and I called him back and he is going to talk to you. There are 2 XRFs in Silverton and I need one of them at least delivered and I will run it if need be. I need a START with XRF for about ½ or 1 day to delineate some small removal areas tomorrow or at the latest Thursday morning, and like I said, I can run it myself if I have to.
